## SHOWCASE

*April showers...and all you need to  
know about bathroom showers*

Like us on Facebook

As the bathtub takes a back seat in some bathroom remodels, the shower has become a main feature in bath design. Small spaces invite more creativity, and showers have evolved to not only be a functional space but a design aspect as well. Mixing different shape tiles and textures, to creating pattern and color are all a part of shower design. Using black hardware and adding more features such as walk in design, are becoming popular. Our showroom has everything you need to create that perfect shower you've always wanted. Visit us for more!

*Kitchen and bath design for a remodel or update, our design professionals can provide all the resources and information you need.*

*We also offer professional and designer discounts*
